Fancy a drink?

School cook can hardly walk

A 46-year-old school cook developed breathing problems after working with flour in the school kitchen. The room was small with poor ventilation.

Her breathing problems became so severe that she could hardly walk. She had to sleep sitting up. Her daily job included dough making in a large mixer..

There were no controls for the flour dust

Stonemason 'as seen on TV' is prosecuted

A stonemasonry business has been fined over dangerous stone dust after the firm appeared on a BBC television programme.

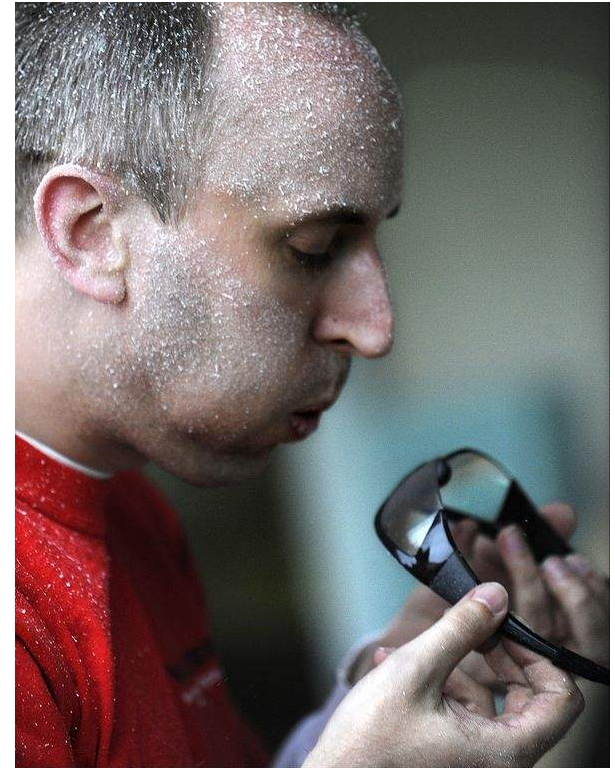

The workshop featured in the series Mastercrafts, but an eagle-eyed viewer contacted HSE to express concern over what he saw: inadequate precautions to protect workers from dust that can cause serious lung diseases...

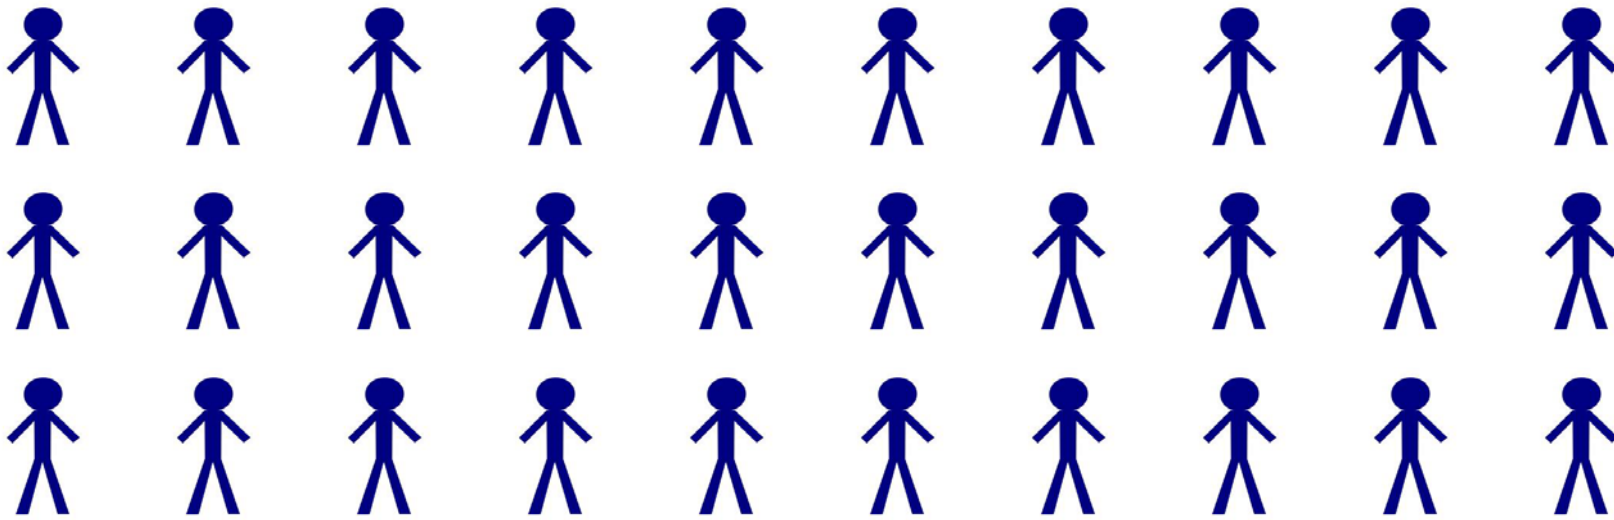

Hopes inquest will highlight danger of working with wood

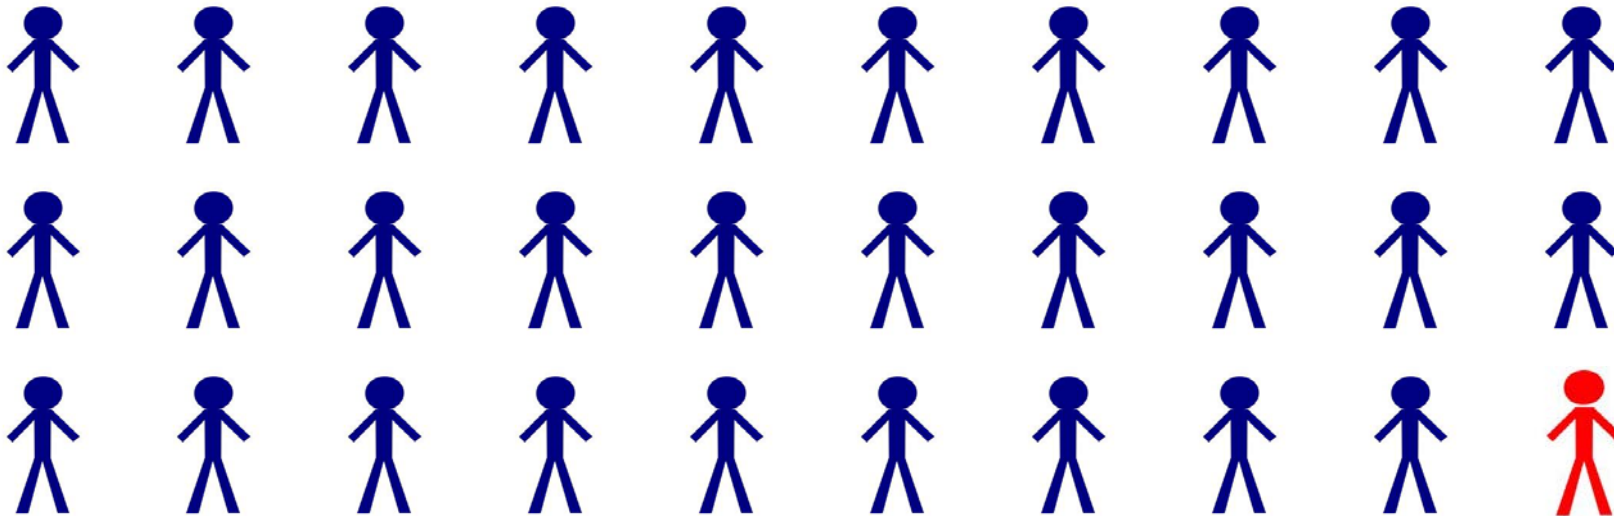

A CARPENTER who was given a false negative cancer result at Eastbourne DGH died of industrial disease, an inquest has heard.

Roy Taylor died at his home on Christmas Day 2009 from a tumour in his nose.

1.2 Million work related illness UK

UK 2013/14 133 fatal injuries at work, over 12,000 deaths from ill health caused by work
